Projects Handled:

Develop and designed an ordering and purchasing system of ECO Metal Fabrication. The system was made for the security of data and for faster and easier transactions in the business. Network investigation and system analysis on the business system support development of Petron Corporation. Conducted a research project in all the car manufacturers in Luzon to determine the feasibility of an Interactive Car Owner's Manual and how will affect the productivity of the business. Made online advertisements and designed web templates for international companies using HTML, CSS, Macromedia Dreamweaver, Adobe Photoshop and Sony Vegas. These projects are made to improve my skills in developing and designing websites.
